

## **MEMSYST REFINED DEVELOPMENT ROADMAP**

### **PHASE 1 — BUSINESS FOUNDATION**

#### **Goal:**

Launch MemSyst as a functioning business and onboard organizations.

---

#### **STAGE 1**

##### **MemSyst Business Operations Platform (M-BOP)**

###### **Purpose:**

Operate MemSyst itself.

###### **Includes:**

Admin Dashboard

Forms Management

Lead Management

CRM Pipeline

Organization Inquiries

Notifications

Tenant Onboarding

User Management

Audit Logs

###### **Outcome:**

MemSyst can capture leads,  
manage prospects,  
convert organizations,  
and onboard tenants.

---

#### **STAGE 2**

##### **Identity & Access Management Platform**

###### **Purpose:**

Create the security foundation.

###### **Includes:**

Authentication

RBAC

Permissions  
Session Management  
Account Recovery  
User Lifecycle

Outcome:

Secure platform access.

---

### **STAGE 3**

#### **Tenant Management Platform**

Purpose:

Provision and manage organizations.

Includes:

Tenant Creation  
Tenant Configuration  
National Structure  
Regional Structure  
Branch Structure  
Tenant Branding  
Tenant Settings

Outcome:

Organizations become operational tenants.

---

### **PHASE 2 — CORE ORGANIZATIONAL OPERATIONS**

**Goal:**

Deliver the primary value proposition.

---

### **STAGE 4**

#### **Membership Management Platform**

Includes:

Member Registration  
Approval Workflows

Member Categories

Apprentices

Renewals

Transfers

Upgrades

Directories

Outcome:

Organizations can fully manage members.

---

## **STAGE 5**

### **Financial Infrastructure Platform**

Includes:

Wallets

Paystack Integration

Ledgers

Revenue Distribution

Commissions

Treasury Rules

Withdrawals

Billing Engine

Outcome:

Financial ecosystem activated.

---

## **STAGE 6**

### **Communication & Engagement Platform**

Includes:

Email

SMS

Push Notifications

In-App Notifications

Messaging Billing

Templates

Campaign Messaging

Outcome:

Organizations can communicate at scale.

---

## **STAGE 7**

### **Identity, Credentials & Certification Platform**

Includes:

ID Cards  
QR Verification  
Certificates  
Printing Lifecycle  
Reprints  
Verification Portal

Outcome:

Digital identity and certification become operational.

---

## **PHASE 3 — MEMBER VALUE & ENGAGEMENT**

### **Goal:**

Increase member participation and retention.

---

## **STAGE 8**

### **Marketplace Platform**

Includes:

Marketplace Posts  
Products  
Services  
Categories  
Discovery  
Moderation

Outcome:

Members gain commercial value.

---

## **STAGE 9**

## **Training & Learning Platform**

Includes:

Training Centers

Courses

Assessments

Apprenticeship Tracking

Learning Records

Outcome:

Professional development ecosystem activated.

---

## **STAGE 10**

### **Support Hub Platform**

Includes:

Loans

Opportunities

Scholarships

Sponsorships

Support Programs

Resource Directories

Outcome:

Organizations deliver member support programs.

---

## **STAGE 11**

### **Events & Programs Platform**

Includes:

Events

Conferences

Workshops

Registrations

Attendance

Event Certificates

Outcome:

Organizations can run events digitally.

---

## **PHASE 4 — GOVERNANCE & INTELLIGENCE**

### **Goal:**

Enable organizational governance and insight.

---

## **STAGE 12**

### **Governance Platform**

Includes:

Executives

Committees

Elections

Voting

Resolutions

Governance Records

Outcome:

Organizations can govern digitally.

---

## **STAGE 13**

### **Analytics & Reporting Platform**

Includes:

Membership Analytics

Financial Analytics

Communication Analytics

Marketplace Analytics

Executive Reports

Outcome:

Data-driven decision making.

---

## **STAGE 14**

### **Integration Platform**

Includes:

API Framework

External Integrations

Webhooks

Third-Party Services

Outcome:

MemSyst becomes extensible.

---

## **PHASE 5 — SCALE & EXPERIENCE**

**Goal:**

Improve usability and automation.

---

### **STAGE 15**

#### **Mobile Experience Platform**

Includes:

PWA Optimization

Mobile UX

Offline Features

Mobile Notifications

Outcome:

Mobile-first experience.

---

### **STAGE 16**

#### **AI & Automation Platform**

Includes:

AI Assistants

Workflow Automation

Content Suggestions

Smart Analytics

Outcome:

Operational efficiency increases.

---

## **PHASE 6 — MEMSYST BUSINESS SCALING**

### **Goal:**

Scale MemSyst as a SaaS company.

---

### **STAGE 17**

#### **Platform Governance & SaaS Operations Platform**

Includes:

- Tenant Registry
- Subscriptions
- Platform Policies
- Support Operations
- Partner Management
- Treasury Oversight
- Compliance
- Security Monitoring

Outcome:

MemSyst can manage thousands of organizations.

---

### **STAGE 18**

#### **Advertising, Sponsorship & Campaign Platform**

Includes:

- Platform Ads
- Tenant Ads
- Campaign Management
- Ad Billing
- Sponsor Management
- Carousel Display
- Targeting Rules

Outcome:

New platform revenue stream activated.

---

## **STAGE 19**

### **Tiering, Discovery & Visibility Platform**

Includes:

Premium Accounts

Premium Posts

Discovery Engine

Visibility Ranking

Premium Placement

Search

Filtering

Analytics

Outcome:

Visibility monetization activated.

---

### **IMPLEMENTATION PRIORITY INSIDE EACH STAGE**

For every stage, development should follow:

1. Database Design
2. Security & Permissions
3. Core CRUD Operations
4. Business Rules
5. Workflows
6. Dashboards
7. Reporting
8. Notifications
9. Audit Logs
10. UI Refinement

Never build UI first and business logic later.

---

### **CRITICAL EXECUTION RULE**

The roadmap is now frozen.

New ideas should be categorized as:

Enhancement

Improvement

Future Version

and should not interrupt active stage development unless they affect:

Security

Finance

Multi-Tenancy

Governance

Core Architecture

This refined roadmap gives MemSyst a logical progression from **startup operations** → **organizational management** → **member value** → **governance** → **intelligence** → **scale** → **monetization**, while keeping development affordable, maintainable, and aligned with your Firebase-first strategy.
