

MEMSYST STAGE 3 DEVELOPMENT MASTER PROMPT

Tenant Management Platform (TMP)

You are a Senior SaaS Architect, Enterprise Systems Architect, Multi-Tenant Platform Architect, Product Architect, and Principal Engineer responsible for building Stage 3 of the MemSyst ecosystem.

Stage 1 established:

- Business Operations Platform (M-BOP)
- Lead Management
- CRM
- Tenant Onboarding
- Notifications
- Audit Infrastructure

Stage 2 established:

- Identity Platform
- Authentication
- Authorization
- RBAC
- Permission Management
- Tenant Isolation
- Security Infrastructure

Stage 3 transforms MemSyst from a prospect management platform into a true multi-tenant digital infrastructure platform capable of managing multiple independent organizations.

This stage creates the organizational foundation upon which membership, executives, branches, regions, finance, marketplace, training, certificates, and analytics will operate.

STAGE 3 OBJECTIVE

Build the:

Tenant Management Platform (TMP)

Purpose:

Enable MemSyst to create, configure, govern, and manage multiple independent organizations (tenants) from a centralized platform.

Each tenant must operate independently while remaining connected to the MemSyst ecosystem.

CORE BUSINESS PRINCIPLE

MemSyst operates as:

One Platform

Multiple Organizations

Each organization receives:

Independent Branding

Independent Configuration

Independent Governance

Independent Membership Structure

Independent Financial Rules

Independent Operational Settings

while remaining managed through the MemSyst platform.

STAGE 3 DELIVERABLES

Build:

Tenant Management Engine

Organization Structure Engine

Governance Engine

Executive Structure Engine

Configuration Engine

Tenant Branding Engine

Organizational Hierarchy Engine

Tenant Lifecycle Engine

MODULE 1

TENANT MANAGEMENT ENGINE

Purpose:

Manage all organizations within the MemSyst ecosystem.

Tenant Record

Every tenant must contain:

Tenant ID
Organization Name
Short Name
Abbreviation
Domain
Subdomain
Organization Type
Country
Region
Status
Created Date

Tenant Status

Prospect
Onboarding
Active
Inactive
Suspended
Archived

Features

Create Tenant
Edit Tenant
Activate Tenant
Suspend Tenant
Archive Tenant
View Tenant
Search Tenant

MODULE 2

TENANT PROFILE MANAGEMENT

Purpose:

Store complete organization information.

Organization Profile

Organization Name

Year Established

Description

Mission

Vision

Objectives

Industry

Contact Information

Website

Social Media Links

Media

Logo

Cover Image

Brand Assets

Documents

MODULE 3

TENANT BRANDING ENGINE

Purpose:

Allow each tenant to have its own visual identity.

Branding Configuration

Logo

Primary Color

Secondary Color

Accent Color

Typography

Theme Settings

Future Usage

Branding must automatically apply to:

Portal
Certificates
ID Cards
Notifications
Reports
Mobile Applications

MODULE 4

ORGANIZATIONAL STRUCTURE ENGINE

Purpose:

Support hierarchical organizational management.

Organizational Levels

MemSyst must support:

National
Regional
Branch
Department

Configuration Rule

Not every organization uses all levels.

Structure must be configurable.

Examples:

National Only
National + Regional
National + Regional + Branch
Custom Structures

Organizational Unit Record

Unit ID
Tenant ID
Parent Unit
Unit Name
Unit Type
Status

MODULE 5

REGIONAL MANAGEMENT

Purpose:
Manage regional organizational structures.

Region Record

Region ID
Region Name
Region Code
Status

Features

Create Region
Update Region
Deactivate Region
Assign Executives
Assign Branches

MODULE 6

BRANCH MANAGEMENT

Purpose:
Manage local operational structures.

Branch Record

Branch ID
Branch Name
Branch Code
Region
Location
Status

Features

Create Branch
Update Branch
Deactivate Branch
Assign Executives
Assign Members

MODULE 7

EXECUTIVE STRUCTURE ENGINE

Purpose:

Define leadership positions within organizations.

Executive Position Record

Position ID
Title
Level
Term Length
Description
Status

Examples:

President
Vice President
Secretary
Treasurer
Organizer
Regional Chairman
Branch Chairman

Features

Create Position
Update Position
Deactivate Position
Define Hierarchy

MODULE 8

EXECUTIVE APPOINTMENT MANAGEMENT

Purpose:

Manage executive assignments.

Executive Assignment

Executive ID
Position
Level
Start Date
End Date
Status

Status

Active
Expired
Resigned
Removed
Completed

Features

Assign Executive
Transfer Executive
Renew Appointment
End Appointment

MODULE 9

GOVERNANCE ENGINE

Purpose:

Support organizational governance.

Governance Configuration

Define:

Approval Levels

Governance Hierarchy

Executive Structure

Organizational Rules

Example

Branch

↓

Regional

↓

National

Approval chains must be configurable.

Not hardcoded.

MODULE 10

TENANT CONFIGURATION ENGINE

Purpose:

Allow each tenant to configure future platform behavior.

Configuration Categories

Membership

Executives

Approvals

Finance

Notifications
Certificates
Training
Marketplace

Requirements

Configuration-driven architecture.

No hardcoded tenant rules.

MODULE 11

MEMBERSHIP FRAMEWORK CONFIGURATION

Purpose:

Prepare Stage 4.

Do NOT build membership management.

Build membership configuration only.

Membership Settings

Membership Categories

Membership Types

Registration Requirements

Approval Rules

Renewal Rules

Examples

Hairdresser

Barber

Beautician

Vendor

(GHABA Example)

Must be configurable per tenant.

MODULE 12

APPROVAL WORKFLOW CONFIGURATION

Purpose:

Prepare future workflow management.

Configurable Approval Chains

Examples:

Branch → Regional → National

National Only

Branch → National

Features

Create Workflow

Edit Workflow

Activate Workflow

Deactivate Workflow

MODULE 13

TENANT SETTINGS MANAGEMENT

Purpose:

Centralized tenant administration.

Settings Categories

General

Branding

Governance

Membership

Finance

Notifications

Training
Marketplace

Requirements

All settings must be manageable through UI.

No database edits required.

MODULE 14

TENANT LIFECYCLE MANAGEMENT

Purpose:

Manage the full lifecycle of organizations.

Lifecycle Stages

Prospect

Onboarding

Active

Inactive

Suspended

Archived

Features

Activate Tenant

Suspend Tenant

Reactivate Tenant

Archive Tenant

MODULE 15

ORGANIZATION DIRECTORY

Purpose:

Provide platform-wide visibility.

Features

Search Organizations
Filter Organizations
View Organization Profiles
View Organizational Structures

Filters

Country
Industry
Status
Organization Type

MODULE 16

TENANT ANALYTICS FOUNDATION

Purpose:

Prepare future analytics.

Track

Tenant Count
Active Tenants
Regions
Branches
Executives
Growth Trends

Note

Do not build full analytics.

Build data structures required for future analytics.

MODULE 17

TENANT DOCUMENT MANAGEMENT

Purpose:

Store organization-level documents.

Examples

Constitutions

Policies

Registration Documents

Governance Documents

Features

Upload

View

Download

Archive

MODULE 18

TENANT AUDIT INFRASTRUCTURE

Purpose:

Track tenant-level changes.

Audit Events

Tenant Created

Tenant Updated

Region Created

Branch Created

Position Created

Configuration Changed

Audit Record

Actor

Action

Module

Record
Timestamp
Before
After

DATABASE DESIGN REQUIREMENTS

Before implementation:

Design complete entities for:

Tenants
Tenant Profiles
Tenant Branding
Regions
Branches
Organizational Units
Executive Positions
Executive Assignments
Governance Structures
Workflows
Tenant Settings
Tenant Documents
Tenant Audit Logs

Define:

Relationships
Indexes
Validation Rules
Status Models
Hierarchy Models

SECURITY REQUIREMENTS

Integrate with Stage 2.

Enforce:

Tenant Isolation
RBAC
Permission Enforcement
Audit Logging

Every record must include:

Tenant ID

where applicable.

FUTURE READINESS REQUIREMENTS

Stage 3 must fully prepare for:

Membership Management

Apprentices

Executive Elections

Wallets

Payments

Certificates

Marketplace

Training

Analytics

AI

Mobile Apps

Do not build these modules.

Design all structures required for them.

ARCHITECTURE REQUIREMENTS

Use:

Domain-Driven Design

Configuration-Driven Architecture

Feature-Based Architecture

Service Layer Pattern

Repository Pattern

Tenant-Aware Services

Avoid:

Hardcoded Organizational Structures

Hardcoded Approval Chains

Hardcoded Membership Categories

Everything must be configurable.

SUCCESS CRITERIA

Stage 3 is complete only when:

- ✓ Organizations can be fully created and managed
- ✓ Branding can be configured per tenant
- ✓ Organizational structures can be configured
- ✓ Regions and branches can be managed
- ✓ Executive positions can be defined
- ✓ Executive assignments can be managed
- ✓ Governance structures can be configured
- ✓ Approval workflows can be configured
- ✓ Tenant settings can be managed
- ✓ Organization documents can be stored
- ✓ Tenant audit history exists
- ✓ The platform is fully prepared for Stage 4 (Membership Platform)

Build this stage as the permanent organizational foundation of the MemSyst ecosystem. Every future membership, executive, financial, training, marketplace, and governance feature will depend on the structures established in this stage.
