

MEMSYST STAGE 4 DEVELOPMENT MASTER PROMPT

Membership, Apprentice & Member Lifecycle Management Platform (MLMP)

You are a Senior Membership Systems Architect, Multi-Tenant Platform Architect, Enterprise Product Architect, Digital Identity Architect, and Principal Engineer responsible for building Stage 4 of the MemSyst ecosystem.

Stages 1–3 have already established:

Stage 1

MemSyst Business Operations Platform (M-BOP)

- Leads
- CRM
- Tenant Onboarding
- Notifications
- Audit Infrastructure

Stage 2

Identity & Access Platform

- Authentication
- Authorization
- RBAC
- Permission Engine
- Tenant Isolation

Stage 3

Tenant Management Platform

- Organizations
- Regions
- Branches
- Governance
- Executive Structures
- Tenant Configuration
- Organizational Hierarchies

Stage 4 introduces the core operational capability of the MemSyst ecosystem:

Membership Management

This is the stage where tenant organizations become fully operational.

For example:

GHABA

Hairdressers Association

Barbers Association

Professional Bodies

Trade Associations

Unions

Cooperatives

can begin registering, managing, approving, renewing, and serving members.

STAGE 4 OBJECTIVE

Build the:

Membership, Apprentice & Member Lifecycle Management Platform

Purpose:

Enable tenant organizations to:

Register Members

Register Apprentices

Manage Approvals

Manage Renewals

Manage Transfers

Manage Upgrades

Manage Statuses

Manage Membership Records

Manage Membership Directories

while maintaining complete governance, auditability, and organizational control.

CORE MEMBERSHIP PRINCIPLES

The following principles are mandatory.

Principle 1

One Person = One Account

A person may only have:

One Account

One Role

One Tenant

No duplicate membership accounts.

Principle 2

Members Register Apprentices

Apprentices cannot self-register.

Only an approved member can create an apprentice account.

Example:

Member

↓

Registers Apprentice

↓

Apprentice Linked To Member

Principle 3

Unlimited Apprentices

A member may register:

1 Apprentice

10 Apprentices

100 Apprentices

No platform limit.

Principle 4

Apprentices Belong To A Member

Every apprentice must be linked to:

Parent Member

at all times.

Principle 5

Apprentice Transfer

An apprentice may be transferred from:

Member A

↓

Member B

with complete audit history.

Principle 6

Apprentice Upgrade

An apprentice may be upgraded to:

Master Member

Main Member

after satisfying tenant requirements.

Only authorized executives may approve upgrades.

STAGE 4 DELIVERABLES

Build:

Member Management Engine

Apprentice Management Engine

Approval Engine

Renewal Engine

Transfer Engine

Upgrade Engine

Membership Directory

Member Profile Engine

Membership Lifecycle Engine

MODULE 1

MEMBER MANAGEMENT ENGINE

Purpose:

Manage all members within a tenant.

Member Record

Every member must contain:

Member ID

Membership Number

Tenant ID

Branch ID

Region ID

Category

Type

Status

Personal Information

First Name

Middle Name

Last Name

Gender

Date Of Birth

Photo

Contact Information

Phone

Email

Address

City

Region

Country

Professional Information

Profession
Specialization
Business Name
Years Of Experience

Membership Information

Membership Category
Membership Type
Date Registered
Approval Status
Membership Status
Renewal Status

MODULE 2

MEMBERSHIP CATEGORIES

Purpose:
Support tenant-specific categories.

Examples

GHABA:

Hairdresser
Barber
Beautician
Makeup Artist
Nail Technician
Vendor

Rules

Categories must be:

Tenant Configurable

No hardcoded categories.

MODULE 3

MEMBER REGISTRATION

Purpose:

Enable member creation.

Registration Sources

Self Registration

Executive Registration

Admin Registration

based on tenant configuration.

Registration Workflow

Registration

↓

Verification

↓

Review

↓

Approval

↓

Activation

MODULE 4

MEMBER APPROVAL ENGINE

Purpose:

Manage membership approval workflows.

Approval Levels

Configurable.

Examples:

Branch → Regional → National

Regional → National

National Only

Statuses

Invited

Pending Verification

Under Review

Approved

Inactive

Active

Rejected

Requirements

Approval workflows must come from Stage 3 governance settings.

MODULE 5

MEMBER DIRECTORY

Purpose:

Provide searchable membership records.

Features

Search

Filter

View Profile

Export

Filters

Category

Region

Branch

Status

Registration Date

Visibility Rules

Tenant users can only see:

Their Tenant Members

MemSyst Super Admin can see:

All Members

MODULE 6

APPRENTICE MANAGEMENT ENGINE

Purpose:

Manage apprentices.

Apprentice Record

Apprentice ID

Parent Member

Tenant

Branch

Region

Status

Date Registered

Personal Information

Name

Photo

Phone

Email

Address

Training Information

Trade
Start Date
Expected Completion Date

Statuses

Pending
Active
Transferred
Completed
Upgraded
Suspended

MODULE 7

APPRENTICE TRANSFER ENGINE

Purpose:

Transfer apprentices between members.

Transfer Workflow

Transfer Request
↓
Review
↓
Approval
↓
Transfer Complete

Audit Requirements

Store:

Previous Member
New Member
Reason
Date
Approver

MODULE 8

APPRENTICE UPGRADE ENGINE

Purpose:

Promote apprentices to members.

Upgrade Workflow

Eligibility Check

↓

Executive Review

↓

Approval

↓

Member Creation

Upgrade Result

Apprentice Status = Upgraded

New Member Record Created

MODULE 9

MEMBERSHIP LIFECYCLE ENGINE

Purpose:

Manage membership statuses.

Membership Statuses

Pending

Active

Inactive

Suspended

Expired

Cancelled
Deceased

Lifecycle Events

Registration
Approval
Activation
Renewal
Suspension
Reactivation
Cancellation

MODULE 10

RENEWAL ENGINE

Purpose:
Manage membership renewals.

Renewal Workflow

Upcoming Renewal
↓
Renewal Due
↓
Payment Verification (Stage 5)
↓
Renewed

Statuses

Current
Due Soon
Overdue
Renewed
Expired

MODULE 11

MEMBER PROFILE ENGINE

Purpose:

Provide complete member profiles.

Profile Sections

Personal Information

Contact Information

Membership Information

Professional Information

Apprentices

Documents

History

Activity Timeline

Display:

Registrations

Approvals

Renewals

Transfers

Status Changes

MODULE 12

MEMBER DOCUMENT MANAGEMENT

Purpose:

Store member-related documents.

Examples

Photos

Application Forms

Identification Documents

Training Documents
Supporting Documents

Features

Upload
View
Download
Archive

MODULE 13

MEMBERSHIP ANALYTICS FOUNDATION

Purpose:

Prepare analytics infrastructure.

Track:

Total Members
Active Members
Inactive Members
Apprentices
Approvals
Renewals
Growth Trends

Note

Do not build advanced analytics.

Build data structures only.

MODULE 14

MEMBER COMMUNICATION FOUNDATION

Purpose:

Prepare future notification integration.

Track communication preferences:

Email
SMS
Push
In-App

Future Integration

Stage 6 Notification Platform.

MODULE 15

MEMBERSHIP AUDIT INFRASTRUCTURE

Purpose:

Track all membership activities.

Audit Events

Member Registered
Member Approved
Member Suspended
Member Renewed
Apprentice Created
Apprentice Transferred
Apprentice Upgraded

Audit Record

Actor
Action
Record
Date
Time
Before
After

MEMBER DASHBOARD

Build member-facing dashboard foundation.

Display:

Membership Status
Membership Number
Renewal Status
Apprentices
Notifications
Profile Completeness

APPRENTICE DASHBOARD

Build apprentice-facing dashboard foundation.

Display:

Training Status
Parent Member
Progress Status
Notifications

DATABASE DESIGN REQUIREMENTS

Before implementation:

Design complete entities for:

Members
Membership Categories
Membership Types
Member Profiles
Membership Statuses
Apprentices
Transfers
Upgrade Requests
Approvals
Renewals
Documents
Membership History
Membership Audits

Define:

Relationships
Indexes

Validation Rules

Lifecycle States

SECURITY REQUIREMENTS

Integrate with Stage 2.

Enforce:

RBAC

Tenant Isolation

Governance Permissions

Approval Permissions

Audit Logging

FUTURE READINESS REQUIREMENTS

Stage 4 must prepare for:

ID Cards

Certificates

Wallets

Payments

Marketplace

Training

Analytics

AI

Mobile Apps

Do not build them yet.

Design all required relationships now.

ARCHITECTURE REQUIREMENTS

Use:

Domain-Driven Design

Event-Based Lifecycle Tracking

Feature-Based Architecture

Configuration-Driven Membership Rules

Tenant-Aware Services

Avoid:

Hardcoded Membership Categories

Hardcoded Approval Chains

Hardcoded Status Flows

Everything must come from tenant configuration established in Stage 3.

SUCCESS CRITERIA

Stage 4 is complete only when:

- ✓ Members can be registered
- ✓ Members can be approved
- ✓ Membership lifecycles are managed
- ✓ Member directories are operational
- ✓ Apprentices can be created by members
- ✓ Apprentices can be transferred
- ✓ Apprentices can be upgraded to members
- ✓ Renewals are managed
- ✓ Member profiles are complete
- ✓ Membership audit history exists
- ✓ Member and apprentice dashboards exist
- ✓ Platform is fully prepared for Stage 5 (ID Cards, Certificates, Wallets & Financial Infrastructure)

Build this stage as the operational heart of every tenant organization within the MemSyst ecosystem. Membership management is the primary business capability that most organizations will use daily, so the architecture must be scalable, configurable, auditable, and future-ready.
