

MEMSYST STAGE 12 DEVELOPMENT MASTER PROMPT

Governance, Elections, Voting & Decision Management Platform (GEVDMP)

You are a Senior Governance Systems Architect, Election Technology Architect, Membership Technology Architect, Enterprise SaaS Architect, and Principal Engineer responsible for building Stage 12 of the MemSyst ecosystem.

Stages 1–11 have already established:

Stage 1

Business Operations Platform

Stage 2

Identity & Access Platform

Stage 3

Tenant Management Platform

Stage 4

Membership & Apprentice Platform

Stage 5

Financial Infrastructure Platform

Stage 6

Communication & Engagement Platform

Stage 7

Digital Identity & Credential Platform

Stage 8

Marketplace, Business Directory & Commerce Platform

Stage 9

Training, Learning, Apprenticeship & Skills Development Platform

Stage 10

Support Hub, Opportunities, Grants, Loans & Member Services Platform

Stage 11

Events, Conferences, Meetings & Attendance Management Platform

Stage 12 introduces the governance and democratic decision-making layer of the MemSyst ecosystem.

This stage enables organizations to manage:

- Elections
- Voting
- Nominations
- Appointments
- Resolutions
- Constitutional Decisions
- Committees
- Governance Workflows

while ensuring transparency, accountability, auditability, and compliance with organizational constitutions.

STAGE 12 OBJECTIVE

Build the:

Governance, Elections, Voting & Decision Management Platform (GEVDMP)

Purpose:

Enable organizations to:

- Conduct Elections
- Manage Nominations
- Run Voting Processes
- Manage Committees
- Record Resolutions
- Track Governance Decisions
- Manage Executive Terms
- Support Democratic Governance

while integrating with membership, credentials, events, communications, and audit systems.

CRITICAL GOVERNANCE PRINCIPLES

Principle 1

Governance Is Tenant Controlled

Every tenant controls:

Governance Structure

Executive Positions

Election Rules

Voting Rules

Nomination Rules

Committee Structures

Approval Structures

No governance model should be hardcoded.

Principle 2

Only Eligible Members Can Participate

Voting rights must be determined through configurable eligibility rules.

Examples:

Active Membership

Membership Duration

Membership Category

Fee Compliance

Branch Membership

Executive Status

Principle 3

Every Vote Must Be Auditable

All voting activities must be:

Traceable

Auditable

Verifiable

Tamper Resistant

while supporting configurable anonymity rules.

Principle 4

Governance History Is Permanent

No governance records may be deleted.

Historical records become part of the organization's institutional memory.

STAGE 12 DELIVERABLES

Build:

Governance Structure Engine

Executive Position Engine

Nomination Engine

Election Engine

Voting Engine

Committee Engine

Resolution Engine

Governance Analytics Engine

MODULE 1

GOVERNANCE STRUCTURE ENGINE

Purpose:

Define organizational governance.

Governance Levels

Examples:

National

Regional

Branch

Committee

Chapter

Council

Features

Create Governance Units

Define Authority Levels

Assign Reporting Relationships
Configure Governance Rules

Requirements

Governance structures must be:

Tenant Specific
Configurable
Version Controlled

MODULE 2

EXECUTIVE POSITION MANAGEMENT

Purpose:

Manage leadership positions.

Examples

President
Vice President
Secretary
Treasurer
Chairperson
Organizer
Committee Member

Position Record

Position ID
Title
Governance Level
Term Length
Eligibility Rules
Status

Features

Create Position
Edit Position
Retire Position
Assign Position
Track Terms

MODULE 3

NOMINATION MANAGEMENT ENGINE

Purpose:

Manage candidate nominations.

Nomination Sources

Self Nomination
Member Nomination
Executive Nomination
Committee Nomination

Nomination Record

Nominee
Position
Nominator
Date
Status

Status

Draft
Submitted
Under Review
Approved
Rejected
Withdrawn

MODULE 4

CANDIDATE MANAGEMENT ENGINE

Purpose:

Manage election candidates.

Candidate Profile

Candidate

Position

Biography

Manifesto

Photo

Status

Features

Publish Candidate

Manage Manifesto

Manage Campaign Profile

Track Eligibility

MODULE 5

ELECTION MANAGEMENT ENGINE

Purpose:

Manage elections.

Election Types

National Election

Regional Election

Branch Election

Committee Election

Referendum

Special Election

Election Record

Election ID
Title
Description
Election Type
Start Date
End Date
Status

Status

Draft
Scheduled
Open
Closed
Certified
Archived

MODULE 6

VOTER ELIGIBILITY ENGINE

Purpose:

Determine voting rights.

Eligibility Rules

Examples:

Active Membership
Membership Duration
Fee Compliance
Branch Membership
Position Eligibility

Requirements

Rules must be:

Configurable
Auditable
Version Controlled

MODULE 7

DIGITAL VOTING ENGINE

Purpose:

Provide secure voting.

Voting Types

Single Choice
Multiple Choice
Ranked Choice
Yes/No
Referendum
Resolution Voting

Voting Record

Election
Voter
Vote Timestamp
Verification Status

Features

Cast Vote
Verify Vote
Prevent Duplicate Voting
Close Voting
Count Votes

MODULE 8

ANONYMOUS VOTING FRAMEWORK

Purpose:

Support confidential elections.

Modes

Anonymous Voting

Identified Voting

Hybrid Voting

Requirements

Maintain:

Vote Integrity

Auditability

Election Transparency

MODULE 9

RESULT MANAGEMENT ENGINE

Purpose:

Manage election outcomes.

Features

Vote Counting

Result Certification

Winner Declaration

Result Publication

Result Record

Candidate

Votes Received

Percentage

Position

Status

MODULE 10

EXECUTIVE APPOINTMENT ENGINE

Purpose:

Support non-election appointments.

Examples

Committee Appointments

Interim Executives

Board Appointments

Special Appointments

Features

Create Appointment

Approve Appointment

Track Appointment Term

Issue Credentials

Integration

Must connect to:

Stage 7 Credential Platform

for executive credentials and appointment certificates.

MODULE 11

COMMITTEE MANAGEMENT ENGINE

Purpose:

Manage committees and working groups.

Committee Record

Committee ID
Name
Purpose
Chairperson
Members
Status

Features

Create Committee
Assign Members
Manage Terms
Track Meetings
Track Decisions

MODULE 12

RESOLUTION MANAGEMENT ENGINE

Purpose:

Manage organizational decisions.

Resolution Types

Policy Resolution
Financial Resolution
Constitutional Amendment
Governance Resolution
Special Resolution

Workflow

Create Resolution
Review
Vote
Approve
Archive

Status

Draft
Under Review
Voting
Approved
Rejected
Archived

MODULE 13

GOVERNANCE MEETING INTEGRATION

Purpose:

Connect governance with Stage 11 events.

Examples

AGM
National Congress
Council Meeting
Executive Meeting
Election Congress

Integration

Must support:

Attendance Verification
Voting Eligibility
Resolution Voting
Election Participation

MODULE 14

GOVERNANCE COMMUNICATION INTEGRATION

Purpose:

Connect governance activities with Stage 6.

Notifications

Election Announced
Nomination Opened
Voting Started
Voting Closing Soon
Election Results Published
Appointment Confirmed
Resolution Approved

Channels

Email
SMS
Push
In-App

MODULE 15

GOVERNANCE CREDENTIAL INTEGRATION

Purpose:

Issue governance credentials.

Examples

Executive ID Cards
Appointment Certificates
Committee Certificates
Leadership Credentials

Integration

Must use:

Stage 7 Credential Platform

MODULE 16

TERM & TENURE MANAGEMENT ENGINE

Purpose:

Track leadership terms.

Features

Term Start

Term End

Term Renewal

Term Expiration

Succession Tracking

Alerts

Notify before:

Term Expiration

Election Due Date

Appointment Expiration

MODULE 17

GOVERNANCE ANALYTICS ENGINE

Purpose:

Provide governance insights.

Metrics

Election Participation

Voting Turnout

Executive Positions

Committee Activity

Resolution Activity

Governance Compliance

Scope

Platform

Tenant

National
Regional
Branch

MODULE 18

GOVERNANCE AUDIT ENGINE

Purpose:

Provide complete governance accountability.

Audit Events

Nomination Submitted
Candidate Approved
Vote Cast
Election Closed
Result Certified
Appointment Made
Resolution Approved

Audit Record

Actor
Action
Record
Date
Time
Before
After

MODULE 19

GOVERNANCE SETTINGS MANAGEMENT

Purpose:

Tenant-level governance configuration.

Settings

Election Rules
Nomination Rules
Voting Rules
Eligibility Rules
Committee Rules
Term Rules
Resolution Rules

Requirements

Everything must be configurable.
No hardcoded governance workflows.

DATABASE DESIGN REQUIREMENTS

Before implementation:

Design complete entities for:

Governance Structures
Executive Positions
Nominations
Candidates
Elections
Votes
Committees
Appointments
Resolutions
Terms
Governance Audits

Define:

Relationships
Indexes
Validation Rules
Eligibility Rules
Election Rules
Lifecycle States

SECURITY REQUIREMENTS

Integrate with Stage 2.

Enforce:

RBAC

Tenant Isolation

Voting Permissions

Election Permissions

Governance Permissions

Audit Logging

COMPLIANCE REQUIREMENTS

All governance activities must support:

Transparency

Auditability

Election Integrity

Historical Preservation

Decision Traceability

No governance records may be deleted.

FUTURE READINESS REQUIREMENTS

Stage 12 must prepare for:

Electronic AGM

Remote Voting

Mobile Voting

Constitution Management

Policy Management

Parliamentary Procedures

AI Governance Assistance

National Federation Governance

Do not build them now.

Design all supporting structures and relationships.

ARCHITECTURE REQUIREMENTS

Use:

Governance Domain Architecture
Workflow-Driven Processes
Election Integrity Controls
Configuration-Driven Rules
Audit-First Design

Avoid:

Hardcoded Governance Structures
Hardcoded Election Rules
Manual Vote Counting
Deleting Governance Records

All governance activities must be transparent, auditable, and historically preserved.

SUCCESS CRITERIA

Stage 12 is complete only when:

- ✓ Governance structures can be configured
- ✓ Executive positions can be managed
- ✓ Nominations can be submitted and reviewed
- ✓ Elections can be conducted digitally
- ✓ Voting eligibility can be enforced
- ✓ Anonymous voting can be supported
- ✓ Election results can be certified
- ✓ Executive appointments can be managed
- ✓ Committees can be managed
- ✓ Resolutions can be proposed and voted on
- ✓ Governance events integrate with Stage 11
- ✓ Governance communications integrate with Stage 6
- ✓ Governance credentials integrate with Stage 7
- ✓ Governance analytics exist

- ✓ Governance audit history is immutable
- ✓ Platform is fully prepared for Stage 13 (Analytics, Intelligence, Reporting & Decision Support Platform)

Build this stage as the democratic governance infrastructure of the MemSyst ecosystem, enabling membership organizations to govern transparently, conduct elections securely, manage leadership structures, and preserve institutional decision-making history
