

MEMSYST STAGE 19 DEVELOPMENT MASTER PROMPT

Tiering, Discovery & Visibility Management Platform (TDVMP)

You are a Principal SaaS Architect, Membership Systems Architect, Marketplace Architect, Discovery Systems Architect, Revenue Optimization Architect, and Enterprise Platform Engineer responsible for building the commercial visibility, discovery, ranking, and premium positioning infrastructure for the MemSyst ecosystem.

This stage introduces monetization-driven visibility mechanisms that allow members, executives, organizations, and advertisers to obtain enhanced exposure while maintaining fairness, relevance, governance, and tenant isolation.

This stage must integrate with:

Stage 4 Membership Platform

Stage 5 Financial Platform

Stage 6 Notification Platform

Stage 8 Marketplace Platform

Stage 9 Training Platform

Stage 11 Events Platform

Stage 13 Analytics Platform

Stage 18 Advertising Platform

This stage does not replace existing modules.

It provides a centralized visibility and discovery layer used across the entire MemSyst ecosystem.

STAGE OBJECTIVE

Build a platform-wide visibility management engine that controls:

Member Account Tiers

Post Tiers

Premium Visibility

Premium Placement

Discovery Ranking

Listing Presentation

Search

Filtering

Relevance Scoring

Carousel Management

Listing Rotation

Visibility Analytics

while creating new revenue streams for both MemSyst and tenant organizations.

CORE PRINCIPLE

Visibility must never be based on fixed ordering.

The system must use:

Weighted Discovery
Relevance Scoring
Randomized Rotation
Premium Benefits
Location Relevance
Freshness

to create a dynamic user experience.

MODULE 1

MEMBER ACCOUNT TIER ENGINE

Purpose:

Provide configurable visibility and service tiers for members.

Supported Tiers

Standard
Premium

Registration Experience

During registration display:

Standard Account
Premium Account

Show:

Registration Fee
Renewal Fee
Benefits
Comparison Table

Default Tier

Standard

unless Premium is selected.

STANDARD ACCOUNT

Features:

Standard Listing

Standard Card Design

Standard Support Queue

Lower Registration Fee

Lower Renewal Fee

PREMIUM ACCOUNT

Features:

Premium Badge

Premium Card Design

Premium Listing Placement

Priority Support Queue

Premium Support Category

Premium Badge Locations

Display badge on:

Profile

Member Directory

Digital ID Card

Printed ID Card

Marketplace Presence

MODULE 2

ACCOUNT UPGRADE & DOWNGRADE ENGINE

Purpose:

Manage account tier transitions.

Upgrade Rules

Standard members may upgrade anytime.

Upgrade Fee Calculation

Formula:

Premium Fee

Minus

Standard Fee

Example:

Standard = GH¢100

Premium = GH¢150

Upgrade Fee = GH¢50

Downgrade Rules

Premium members may only downgrade during renewal.

Renewal Decision

Options:

Renew Premium

Downgrade To Standard

Auto Renewal Rule

If no downgrade request exists:

Auto Renew Premium

MODULE 3

POST TIER ENGINE

Purpose:

Create premium visibility opportunities for content.

Supported Post Tiers

Standard

Premium

Post Creation Experience

Display:

Standard Post

Premium Post

Show:

Posting Fee

Visibility Benefits

Comparison Table

STANDARD POST

Features:

Standard Card

Standard Visibility

Lower Posting Fee

PREMIUM POST

Features:

Premium Badge

Premium Card Design

Premium Carousel Inclusion

Priority Discovery

In-App Notification Distribution

Higher Visibility

MODULE 4

PREMIUM NOTIFICATION ENGINE

Purpose:

Increase visibility of Premium Posts.

Branch Executive Premium Post

Notify:

Branch Members

Regional Executive Premium Post

Notify:

Regional Members

National Executive Premium Post

Notify:

Entire Tenant

Channel

In-App Notifications Only

MODULE 5

PREMIUM BENEFITS ENGINE

Purpose:

Centralize premium privileges.

Member Benefits

Premium Card Design
Premium Badge
Premium Listings
Priority Support
Future Premium Features

Post Benefits

Premium Card Design
Premium Discovery
Premium Carousel Placement
Notification Distribution

MODULE 6

LISTING LAYOUT ENGINE

Purpose:

Standardize listing pages throughout MemSyst.

Applicable Pages

Members Directory
Marketplace
Training Centers
Events
Support Listings
Business Directories
Executive Listings

ROW 1

Premium Carousel

Reserved exclusively for:

Premium Members
Premium Posts

Advertisements prohibited.

Display Rules

Responsive
Infinite Carousel
Smooth Transition
Auto Rotation

ROW 2

Advertisement Carousel

Reserved exclusively for:

Platform Ads
Tenant Ads

from Stage 18.

ROW 3+

Main Listings

Display:

Standard Listings
Premium Listings

together.

MODULE 7

AD INSERTION ENGINE

Purpose:

Blend monetization with discovery.

Rule

After every:

10 Listing Rows

insert:

Advertisement Row

automatically.

Requirements

Responsive

Randomized Ads

No Duplicate Ad Row

MODULE 8

DISCOVERY ENGINE

Purpose:

Determine listing visibility.

Discovery Method

Use:

Weighted Random Discovery

not fixed ordering.

RELEVANCE MODEL

Weight:

Freshness = 50%

Location = 30%

Premium = 20%

Freshness Factors

New Accounts

New Posts

Recently Updated Profiles

Recently Updated Listings

Location Factors

Same Branch

Same Region

Same Tenant

Premium Factors

Premium Member

Premium Post

MODULE 9

LOCATION RELEVANCE ENGINE

Purpose:

Improve local discovery.

User Context

Evaluate:

Branch

Region

Tenant

Member Category

Prioritize

Listings most relevant to user location.

MODULE 10

RESHUFFLE ENGINE

Purpose:

Prevent static visibility.

Trigger

Page Refresh

Action

Recalculate Scores

Reshuffle Listings

Generate New Order

Rules

No Fixed Position

No Permanent Ranking

No Manual Pinning

MODULE 11

SEARCH ENGINE

Purpose:

Provide fast discovery.

Search Scope

Search must remain scoped to current module.

Examples:

Members Page → Members Only

Marketplace → Marketplace Only

Training → Training Only

Events → Events Only

Search Criteria

Name

Keyword

Location

Category

Branch
Region
Membership Type

MODULE 12

FILTER ENGINE

Purpose:

Improve discoverability.

Supported Filters

Region
Branch
Category
Status
Premium Only
Standard Only
Date Added
Membership Type

Filters vary by module.

MODULE 13

PREMIUM CAROUSEL ENGINE

Purpose:

Display premium content.

Content Sources

Premium Members
Premium Posts

Only.

Layout

Desktop:

6 Cards

Tablet:

3 Cards

Mobile:

PremiumListings
PremiumCarouselItems
SearchLogs
FilterLogs
VisibilityAnalytics
TierPayments

SECURITY REQUIREMENTS

Enforce:

RBAC
Tenant Isolation
Permission Controls
Audit Logging
Financial Validation

PERFORMANCE REQUIREMENTS

Support:

Millions of Members
Millions of Posts
Real-Time Discovery
Fast Search
High Carousel Traffic
High Analytics Volume

SUCCESS CRITERIA

Stage 19 is complete only when:

- ✓ Member Account Tiers exist
- ✓ Premium Membership exists
- ✓ Upgrade & Downgrade Engine exists
- ✓ Premium Badge System exists
- ✓ Premium Card Design System exists
- ✓ Priority Support Queue exists
- ✓ Post Tier System exists
- ✓ Premium Posts exist
- ✓ Premium Notifications exist
- ✓ Premium Carousel exists
- ✓ Advertisement Carousel Integration exists
- ✓ Discovery Engine exists
- ✓ Relevance Scoring exists

- ✓ Weighted Random Visibility exists
 - ✓ Listing Reshuffle exists
 - ✓ Search Engine exists
 - ✓ Filter Engine exists
 - ✓ Visibility Analytics exists
 - ✓ Wallet Billing Integration exists
 - ✓ Audit Logging exists
 - ✓ Full Tenant Isolation exists
-

FINAL OBJECTIVE

Stage 19 transforms MemSyst from a management platform into a visibility-driven digital ecosystem by introducing premium memberships, premium content promotion, intelligent discovery, relevance-based listings, and monetized visibility opportunities while maintaining fairness, transparency, and scalability across all tenants.
